Todd,

Please contact Larry Collier (813-273-2966 l.collier@verizon.com) regarding your collocation questions.

For interconnection, you would first submit a forecast, we would hold a conference call to discuss and revise the forecast if necessary. Once we have an agreed upon forecast, you can submit orders for trunking. It takes approximately 15 days from the receipt of a clean (no errors) order to establish trunking.

Best regards,

PM

Hi Charles,  
Would you be able to help me with these questions from Todd?  
I'm off for a few days & will be back on Thursday..  
Thanks so much for your help,  
Dianne

Re: Illinois

To: DIANNE M. MCKERNAN/EMPL/NJ/Bell-Atl@VZNotes  
cc:  
Subject: Illinois

Is there co-locate space available at:

SWITCHING ENTITY: DKLBIAXA50T  
D12 OCN 1036 (GTE NORTH, INC. - ILLINOIS in GT)  
225 E LOCUST ST  
DE KALB, IL 60115

How long does it take to establish co-location?

How long would it take to get interconnection trunks if we co-locate in the central office?

Thank you

Todd,

It has been almost two months since Charles sent this message to you. Since you decided to pursue interconnection in Illinois by signing an Interconnection Agreement, please advise me of your intentions. In order to proceed with your request, please provide me with the required forecast (found on the Verizon wholesale markets web-site), and the location of your intended Point of Interconnection so we may begin the process. Once I receive this information, Verizon's technical support team will be able to arrange a conference call with you and Verizon's various departments to negotiate the requirements for this project to begin the installation process.

I look forward to hearing from you soon,

Dianne McKernan

Date: Tue, 18 Dec 2001 14:16:31 -0600

Todd,

On December 11, 2001, Verizon received North County Communications's request to adopt an agreement for the state of Illinois.

Here is a sample list of agreements that are available for adoption at this time:

@link f/k/a Dakota Services (expires 6/26/02)  
AT&T (expires 6/28/02)  
Omniplex Communications Group, LLC (expires 7/20/02)  
Digital Pipeline Communications (expires 9/22/02)  
New Edge Network, Inc. (expires 12/31/02)  
Direct2Internet Corporation (expires 1/15/03)  
BitWise Communciations (expires 7/31/03)

Please let us know when you have made your selection.

Please complete and return via e-mail the attached Information Request Form for each of the states above in order to provide Verizon with the necessary information to proceed with this request.

In addition, the Verizon Support Website will provide you with additional information. The URL address is <http://www.verizon.com/wise>.

Once again, I am disappointed in Verizon. Verizon will no longer accept paper documents from North County. You require us to send simple forms in an Excel spreadsheet format. This doesn't even make sense. The dictionary defines spreadsheet as, "A piece of paper with rows and columns for recording financial data for use in comparative analysis." Sending contact information in an Excel Spreadsheet is not a telecom or even a business industry standard.

Although sending documents electronically that are going to be modified and reviewed multiple times by both parties is an industry and business standard.

I am simply asking for the same courtesy. You clearly have these documents in electronic form.

Because of this unnecessary delay, we will probably be changing our interconnection agreement several times.

Since it is necessary for us to have an interconnection agreement before we can go to the next level, I am formally requesting that Verizon and North County opt into the AT&T agreement in Illinois.

RE: INTERCONNECTION AGREEMENT BETWEEN VERIZON AND NORTH COUNTY  
COMMUNICATIONS CORPORATION IN THE STATE OF ILLINOIS

Dear Mr. Dicks,

Attached is an executable document between your company and Verizon.  
Please print two (2) copies of the signature page, sign, and return the  
originals to the following address:

Annette Semler  
Verizon Communications  
600 Hidden Ridge, HQE03D32  
Irving, TX 75038

Verizon will execute all documents, return one complete original to you for  
your files and coordinate the filing with the state commission.

Please note that the rates and terms contained in the attached document are  
subject to change if the document is not executed within 60 days of the  
date of this correspondence.

Please contact Renee Ragsdale, 972-718-6889, if you have any questions.

Todd,

I just wanted you to know we are looking into your request for service locations, but will not be able to provide you an answer by Monday. Monday is a Federal Holiday and Verizon employees have the day off.

I recognize your reluctance to complete the forecast template, however, the information you provided in your email is not sufficient. Would you please reply back to me with your trunking requirements for Illinois incorporating the required information below:

LATA  
ACTL (Access Customer Terminal Location) / POI (Point of Interface) to be determined  
type of trunking  
number of anticipated trunks,  
Verizon Switch CLLI  
Traffic Origination  
Direction and Type of Signaling  
Carrier Switch CLLI  
INTERFACE TYPE (Point of Interconnection)  
56 KB or 64 Clear Channel

I will take care of the forecast form.

I hope you have a very pleasant holiday week-end.

Dianne McKernan  
Account Manager

Please provide me a list of locations where you have sufficient capacity  
where I can turn up in thirty days. As I have told you before, I am  
completely flexible as far as locations. While I do not expect you to  
choose my location for me, I do expect you to cooperate in providing me  
the information on locations where you have sufficient capacity  
to avoid having to wait six months to a year for a fiber build.

As for the forecast information, please see my attached e-mail.  
Nothing in the Telecom Act or any tariff requires me to provide this  
information to you using a specific program. Feel free to have your  
data entry people enter it into your system using any program or format  
they wish. I certainly would not require you to provide me ASR's in  
the Wordperfect for Unix format.

I expect to hear from you by Monday regarding site selection.

I am surprised that Verizon is asking some of this information since has this information already. It does have an operation in De Kalb and would obviously need it to operate. Nevertheless, I will as much information as I can. We would like the exact same type of circuits we have in West Virginia.

> LATA

De Kalb Illinois is in LATA 364. It is called the Sterling Illinois LATA.

> ACTL (Access Customer Terminal Location) / POI (Point of Interface) to be determined

This information will obviously depend upon the information you provide next week.

> type of trunking

MF interconnection trunks riding Tls. (DS1s)

> number of anticipated trunks,

24 trunks (1 DS1) of local traffic  
96 trunks (4 DS1s) of toll traffic. Although, I can get by with as little as 24 trunks (1 DS1)

> Verizon Switch CLLI

The CLLI of Verizon tandem in De Kalb Illinois is DKLBILXA50T.

> Traffic Origination

One way or two way trunks. Although, all our traffic will be inbound to North County.

> Direction and Type of Signaling

P-013

Re: Illinois

MF signalling.

> Carrier Switch CLLI

We obviously can't get a switch CLLI until we have a location. We will pick a location once Verizon provides us with the capacity information next week.

> INTERFACE TYPE (Point of Interconnection)

> 56 KB or 64 Clear Channel

56 KB T1's with D4/AMI signalling  
in the Feature Group D format.

> I hope you have a very pleasant holiday week-end.

I hope you also have a pleasant holiday.

I will contact a realtor ASAP.

Since there is plenty of capacity, am I correct in assuming that we could be up in running within thirty days of the date we secure the office and place an order?

>

> Also, would you please clarify your forecast statement below regarding toll

I am talking about interlata and/or intralata toll calls that would be coming to us from long distance carriers.

These trunks will allow our local customers in Dekalb to receive toll calls coming from the long distance carriers.

It is my understanding that Verizon requests this type of traffic to be on a separate trunk group and you would like us to order these T1's. This was my understanding in West Virginia. If I am incorrect, please let me know.

Thank you for your help.
